

## **Next Week Plan**

### **This Week Summary**

- Set up PostgreSQL database locally.
- Loaded stock price data (SPY.csv) into a table in the PostgreSQL database.
- Current file structure includes folders for backend (FastAPI) and database setup.

### **Next Week Plan**

- **Implement backend features using FastAPI (API routes, data querying, processing).**
- **Begin development of the frontend using React.**
- **Integrate backend with the frontend to enable data visualization.**
